WORK EXPERIENCE

NewAge Products .inc

Jr. Software Engineer

📅 June 2022 – Current   📍 Mumbai, India

Centralized Admin Portal for Inventory Management

- Created an admin portal to manage inventory, stock status, shipping services, and installation services.
- Automated notification features to alert customers when products are back in stock.
- Tools: JavaScript, Next.js, React.js, Express.js, Node.js, HTML,CSS SQL, Prisma, and GraphQL.

Draft Order Portal

- A comprehensive portal to streamline order placement for offline customers.
- Implemented a dynamic discount system that offers personalized discounts based on the customer's cart total and purchase history, enhancing customer satisfaction and loyalty.
- Tools: Next.js, React.js, JavaScript Express.js, Node.js, SQL, and GraphQL.

Bundle Discount Portal

- Developed a portal that offers add-on discounts for main products, allowing customers to purchase related add-on products at discounted rates.
- Utilized front-end technologies: React.js, Next.js, and JavaScript for a seamless user experience.
- Integrated with Shopify e-commerce platform using Express.js, Node.js, and Shopify Liquid to handle product interactions and discount logic effectively.
- Tools: React.js, Next.js, JavaScript, Express.js, Node.js, and Shopify Liquid, and SQL.

Pricing App

- Built a portal to upload and manage pricing data for over 10,00,000 SKUs, including comparison and sale prices.
- Designed and implemented the database schema for efficient data handling.
- Integrated Shopify Liquid for seamless e-commerce functionality.
- Tools: PHP, Laravel, and SQL.

Trade Store E-commerce Website

- Designed an e-commerce platform for wholesale dealers to facilitate bulk product orders.
- Implement a tier-based discount system based on purchase history, order history, and promotional discounts.
- Tools: Shopify Liquid, JavaScript, HTML, CSS, Next.js, Express.js, Node.js, and SQL.

Shopnewage E-commerce Website

- Regularly update and improve the user interface. Develop and implement discount logic. Update the home page, menu, and portal designs. Perform updates on product information pages (PIP) and collection pages.
- Tools: Shopify Liquid, JavaScript, HTML, CSS.

SUMMARY

Full Stack Developer with expertise in JavaScript, React.js, Next.js, Node.js, Express.js, Shopify Liquid, and MySQL. Skilled in both frontend and backend development, crafting robust and scalable web applications. Proficient in JavaScript and e-commerce integrations with deep knowledge of the Shopify ecosystem. A strong problem solver committed to delivering high-quality, user-centric solutions. Thrives in collaborative environments, consistently driving projects to success.

EDUCATION

B.E in Computer Science

Srinivas University, college of engineering and technology

📅 2018 – 2022   📍 Mangaluru, India
